Do I need a Toolkit License key?

Clemens - 2024-09-27 - Toolkit

If you use Toolkit configuration software, there will be a pop up message saying you have to enter a licence key.

If you want only to configure easYgen controllers Toolkit is free and no License Key is required.

You can just ignore the pop up window asking for License key

There is a Toolkit Developer License to modify look and feel of Toolkit according your needs.

This Developer Toolkit License can bought and entered then in Toolkit to license software
