easYview the mini SCADA system

Simon - 2025-03-04 - easYview

Woodward's first derivate of the easYview product range

P/N 8446-1071

ANNUNCIATOR - EASYVIEW-07-030

Standard features:

- visualization of up to four gensets
- customize with your logo
- customize with your boot-up screen
- atvise software license is included with each product

The easYview comes pre-engineered visualization for up to four gensets connected to a mains. The software allows the user to include more easYgen controls and to identify these via a Woodward automatic network check.

Based on the very powerful visualization software atvise you can customize the screen to your needs.

Full SCADA customization with atvise software

engineering time savings

leverage on Woodward's pre-engineered software with consistent object orientation in the engineering of data structures and graphic objects

**simple**

intuitive web-visualization engineering tool without Web-Knowledge

**more clients**

the easYview server allows you to embed the visualization into 3rd party SCADA or run it via web-clients on various devices like a central industrial PC or a laptop.

**Freedom**

plenty of room for individualization

**Openness**

easy connectivity to other systems through open interfaces

**Scalable**

for different screen sizes

**Full functionality**

all developer features can be used in full, without any restrictions
