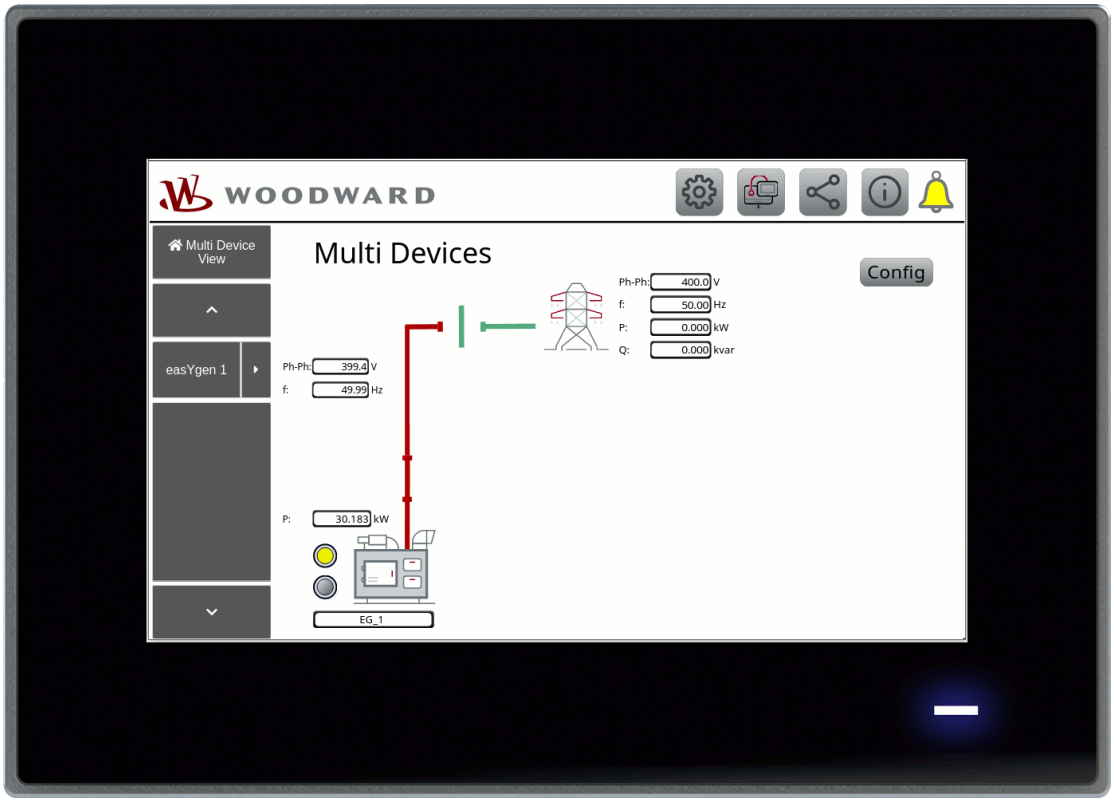
easYview the mini SCADA system

Simon - 2025-03-04 - easYview

Woodward's first derivate of the easYview product range



P/N 8446-1071
ANNUNCIATOR - EASYVIEW-07-030

Standard features:

- visualization of up to four gensets
- customize with your logo
- customize with your boot-up screen
- atvise software license is included with each product

The easYview comes pre-engineered visualization for up to four gensets connected to a mains. The software allows the user to include more easYgen controls and to identify these via a Woodward automatic network check.

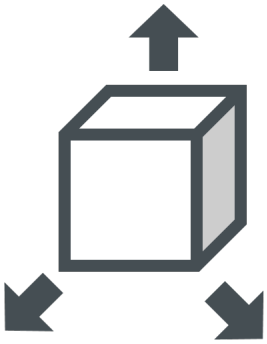
Based on the very powerful visualization software atvise you can customize the screen to your needs.

Full SCADA customization with atvise software

engineering time savings
leverage on Woodward’s pre-engineered software with consistent object orientation in the engineering of data structures and graphic objects

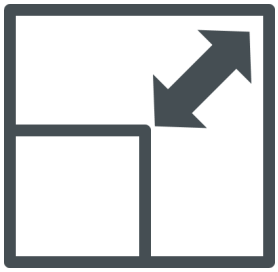
simple
intuitive web-visualization engineering tool without Web-Knowledge

more clients
the easYview server allows you to embed the visualization into 3rd party SCADA or run it via web-clients on various devices like a central industrial PC or a laptop.

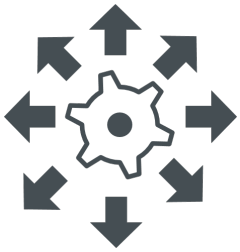


Freedom
plenty of room for individualization

Openness
easy connectivity to other systems through open interfaces



Scalable
for different screen sizes



Full functionality
all developer features can be used in full, without any restrictions
