Load old DSLC-2 WSET File into DSLC-2XT

Clemens - 2023-01-24 - DSLC-2

Load an old DSLC-2 .wset file

- Open ToolKit version 6.4 or higher
- Go to TAB [Settings] and Click [Associate w/ Application] → Window appears
- Select thewset file to be updated and Click »Next >«
- Select the DSLC-2XT- .sid file and Click »Next >«
- Define name and location/folder of new .wset file where settings will be saved to and Click >Next >< \rightarrow Now it will take some seconds
- If settings conversion is installed between the original software version and the target version defined by the target *.sid file (which comes with installing the tool for this particular easYgen version), an automated settings conversion will be started Settings differences will be detected and resolved If resolving was not possible, a list with information and possible warnings is displayed This information is also available in \ProgramData\Woodward\ToolKit \SettingsConversion\conversionlog.txt on the PC
