remote monitoring with 101 solutions

Simon - 2024-10-10 - easYgen-3000

Remote monitoring and access

- Making a VPN connection via the web portal
- · Create your (combined) alarm notifications
- · Create user accounts with various authorizations
- Readouts with high frequency (1x sec)
- · Links via APIs to other back office systems
- · Available with or without a SIM card

• The system is delivered plug-and-play and configured by 101Solutions for the controller you want to monitor. If necessary, the configuration is adjusted remotely (free of charge).
