

## Where can I find Toolkit SID file ?

Clemens - 2024-03-15 - Toolkit

ToolKit asks for a \*.SID file during the first connection to that device. Once this got defined, ToolKit will not ask again.

The \*.SID file should be located in the same directory as the \*.WTOOL file.

If you don't have the \*.SID file yet, many controls configuration files can get downloaded here:

<https://www.woodward.com/en/support/industrial/technical-help-desk/control-configuration-files>

- download a zipped \*.MSI file (Microsoft Installer Package), which contains the WTOOL and SID file

File types for your reference:

\*.WTOOL File = contains all display screens and pages for online configuration, which are associated with the respective \*.SID file.

\*.SID File = contain all display and configuration parameters available in ToolKit

\*.WSET File = contain all settings of the ToolKit configuration parameters provided by the SID file or user-defined settings read from the unit.

Please add or modify the file location directory:

### **Woodward Windows based installers, got changed over time, which results in different possible SID file directories:**

- C:\ProgramData\Woodward\ToolKit\Applications (ProgramData is a hidden folder in default settings of Microsoft)

- C:\Program Files (x86)\Woodward\ToolKit\Applications
- C:\Users\username\Documents\Woodward\Toolkit\Applications
- user-defined locations
