8440-2323 DTSC-200A-P2 with integral ModbusTCP Ethernet port launched

2025-10-20 - Clemens - Product Release

Introducing the Latest Innovations in Communication Modules: DTSC-200A Series

We are excited to announce the expansion of our DTSC-200A series with two cutting-edge models designed to meet diverse communication needs.

1. **8440-2297 DTSC-200A-P1**
   This advanced module offers seamless connectivity with **CANopen** and **RS485 Modbus**, delivering reliable performance for industrial automation applications.

2. **NEW: 8440-2323 DTSC-200A-P2**
   Building on the capabilities of the P1 model, this newly launched module features an **integrated ModbusTCP Ethernet port**, providing enhanced flexibility and greater compatibility for modern industrial networks.
