Handheld replacement for DSLC first generation

Clemens - 2023-12-20 - DSLC

DSLC and MSLC were configured with the Handheld Programmer 9907-205. However, this programmer has been made obsolete by Woodward in September 2022, as stated in the Product Support Statement provided in this link.

A suitable replacement for the programmer can be obtained from Termiflex Warner company at www.termiflex.com.

Woodward excludes any technical liability for this aftermarket solution, as it has not been tested.
