## easYview the mini SCADA system

Simon - 2024-10-10 - easYview

**Woodward's first derivate of the easYview product range**

P/N 8446-1071

ANNUNCIATOR - EASYVIEW-07-030

**Standard features:**

- visualization of up to four gensets
- customize with your logo
- customize with your boot-up screen
- atvise software license is included with each product

The easYview comes pre-engineered visualization for up to four gensets connected to a mains. The software allows the user to include more easYgen controls and to identify these via a Woodward automatic network check.

Based on the very powerful visualization software atvise you can customize the screen to your needs.

**Full SCADA customization with atvise software**

**engineering time savings**
leverage on Woodward's pre-engineered software with consistent object orientation in the engineering of data structures and graphic objects

**simple**
intuitive web-visualization engineering tool without Web-Knowledge

**more clients**
the easYview server allows you to embed the visualization into 3rd party SCADA or run it via web-clients on various devices like a central industrial PC or a laptop.

**Freedom**
plenty of room for individualization

**Openness**
easy connectivity to other systems through open interfaces

**Scalable**
for different screen sizes

**Full functionality**
all developer features can be used in full, without any restrictions
