

Not able to save settings from DTSC-200 (8440-1868 L)

Simon - 2025-09-04 - DTSC-200

DTSC-200 PN: 8440-1868-L SW: 5418-6258-E

Message: the generation of a wset file breaks in Toolkit (the file settings were partially read and need to be

resaved)

there will be no wset file generated

How to repair device?

- 1. Execute factory default settings over Toolkit (ID 1704 = Yes, 1701 = Yes) in Code level 5
- 2. Other possibility:
 - $\circ~$ in Toolkit, go to the page Parameter / Configure application / Display options
 - \circ Write the 4 Free message texts with ID 166622, 16623,16624 and 16625 to any value
